**THE MAGNIFICENT 8  
FEATURES OF THE  
imagePROGRAF™ series**

# YOUR PERFECT PRINTER WILL HAVE:

**PROFESSIONAL IMAGE QUALITY WITH VIVID REDS**

**ENHANCED PRODUCTIVITY**

**BORDERLESS PRINTING**

**INTUITIVE FUNCTIONALITY**

imagePROGRAF TM-355 MFP Z36

**EASY TO PLACE ROLL PAPER**

**SEAMLESS SCANNING**

**LESS OPERATING NOISE**

**SUSTAINABILITY IN MIND**

## 1. PROFESSIONAL IMAGE QUALITY

Get eye-catching, professional quality prints, with crisper lines due to stable image enhancements.

The new magenta ink helps achieve a more brilliant red. Lucia TD ink provides high resistance to water and light exposure. Together, you get clear CAD prints and colourful posters that stand the test of time. And with colour calibration, you can keep colour output consistent across your print fleet.

## 5. EASY TO PLACE ROLL PAPER

Roll paper can be replaced easily from the front, accessing through a flat-top cover and simply placing the roll on the cover, then into the feeder.

Automatic media type and media remaining detection means anybody can print using the imagePROGRAF TM series, saving time and reducing errors.

## 2. ENHANCED PRODUCTIVITY

Faster printing speed and processing time and a quick return from sleep mode mean that you'll get more jobs done, faster, with the imagePROGRAF TM series.

What does that look like? Quicker processing page-to-page time, improved PDF print performance for the HDD-equipped TM-255 and TM-355, and printing an A1 CAD drawing in as little as 17 seconds\*.

\*using the imagePROGRAF TM-350/355

## 6. SEAMLESS SCANNING

The MFP configurations in the TM series range include an integrated scanner with the latest software, powered by a system controller with a 15.6" touchscreen\*.

Print and scan at speed simultaneously and preview or edit scanned images easily for a more productive workflow.

\*Applies to imagePROGRAF TM series MFP Z36 models, whereas imagePROGRAF TM series MFP Lm models have a 3" touchscreen

## 3. BORDERLESS PRINTING

Save time trimming excess margins with Borderless Printing. The technology automatically detects paper edges and gives full bleed, borderless images of any size from a single roll, straight from the device.

## 7. LESS OPERATING NOISE

With less operating noise than a quiet library – at just 39dB or 41dB depending on the model\* – the imagePROGRAF TM series is ideal for noise-sensitive environments such as offices or schools.

\*39dB: imagePROGRAF TM-240, imagePROGRAF TM- 340  
41dB: imagePROGRAF TM-255, imagePROGRAF TM-350, imagePROGRAF TM-355

## 4. INTUITIVE FUNCTIONALITY

The imagePROGRAF TM series has simplified functionality, including a larger touch display with intuitive instructions and key information such as ink balance, media type, and remaining media amount.

## 8. SUSTAINABILITY IN MIND

Environmentally conscious, the imagePROGRAF TM series features a standby power-saving function and is EPEAT Gold\* rated for low energy consumption. The packaging is entirely free of expanded polystyrene (EPS), a first for the large format printing industry.

\*EPEAT Gold registered in the U.S.
